

# What can we do to change the fact that 7.4% of Surrey adults don't get enough to eat?

## Increase access

We are working to reduce transportation barriers which make it difficult to access food stores.

## Increase knowledge

We are partnering to provide opportunities for community members to learn more about obtaining and preparing healthy food.

## Increase availability

We are working to ensure that healthy, affordable food is available in all Surrey neighbourhoods.

## Increase income

We are creating economic opportunities for Surrey residents who face barriers to employment.

*It's time for a change*
